- Corporate Introduction
- Financial Review
- Sustainability Report
- Market Review & Business Outlook

CORPORATE INTRODUCTION

“To be the Preferred Global Oil Service Specialist Partner”

Having served the industry for over 30 years, Mermaid Maritime boasts of a proven track record for subsea and drilling oil service excellence. Headquartered in Thailand, Mermaid Maritime operations span from Saudi Arabia to the United Arab Emirates, Qatar, Singapore, and Indonesia.

Mermaid Maritime mission is to provide essential services in the areas of subsea engineering and offshore drilling to the offshore oil and gas industry that is safe, efficient, on time and on budget. With a team of more than 1,000 people including professional divers, drillers, technicians, surveyors, and modern vessels and equipment, Mermaid Maritime commands a solid reputation in the market place for serving customers in the region from within the region.

The relentless focus on customer satisfaction and RESPECT has resulted in Mermaid winning repeat customers and new customers over the years. It is also an achievement that we intend to use as the foundation for our further growth.

Mr. Prasert Bunsumpun
Chairman

30+ years industry experience including CEO of Thailand's National Oil Company PTT and Chairman of PTT Exploration and Production

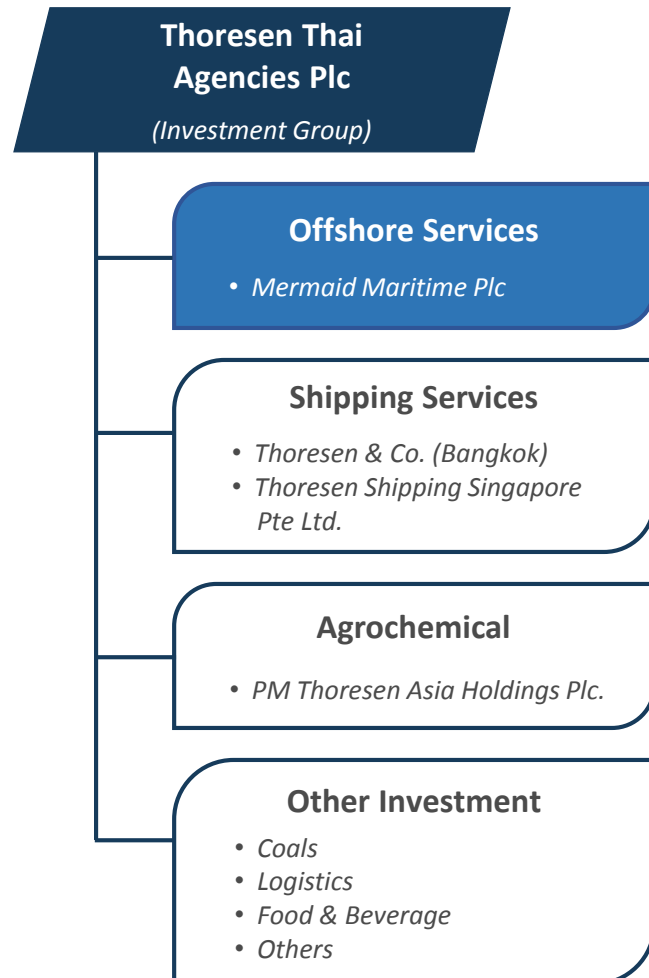

Mr. Chalermchai Mahagitsiri
Executive Vice Chairman & CEO

Proven track record of successfully managing and growing a variety of businesses including coffee, steel, copper, shipping, media, entertainment, resorts and golf courses

MEMBER OF THORESEN GROUP

- Thoresen Thai Agency is among the largest marine group in Thailand
- In addition to Mr. Prasert Bunsumpun, Mermaid Maritime benefits from the leadership of two industry veterans sitting on Thoresen Group Board of Directors

Mr. Cherdpong Siriwit

A veteran in Thailand's energy sector with previous appointments as the Director General of the Ministry of Industry's Department of Mineral Resources, Permanent Secretary of the Ministry of Energy and Chairman of PTT

Mr. Chitrapongse Kwangsukstith

A former Senior Executive Vice President and Acting President of PTT; also previously served as the President of PTTEP and Deputy Governor of Corporate Strategy at Petroleum Authority of Thailand

- Under the stewardship of Thoresen Group, Mermaid has seen major earnings turnaround; tripling profits in last two consecutive years

MERMAID ROADMAP

MERMAID

Stock Information	
Last Price (S\$)	0.154
52 Week High/Low (S\$)	0.255/0.119
Market Cap (S\$ mn)	217.6
Shares Outstanding (mn)	1,413.3
Free Float	22.7%

Closing price as at 16 March 2018

1983

Founded by Danish mariners as Mermaid Marine Services Ltd. to provide offshore marine services such as life raft and firefighting maintenance services

1995

Renamed Mermaid Maritime Ltd.

2003

Acquired first Remotely Operated Vehicle (ROV) and air dive support vessel

2007

Successfully raised S\$246m from its IPO on the Singapore Stock Exchange (SGX)

2005

Expanded into tender drilling rig business by acquiring two tender rigs

2008

Acquired Seascope Surveys for access to hydrographic and positioning services

2010

Acquired Subtech Middle East to expand subsea services in Middle East and Arabian Gulf

Acquired 49% stake in Asia Offshore Drilling to expand into jack-up drilling rig business

2012

PM Group Acquires Thoresen:

- Provided leadership stability
- Implemented new strategic direction
- Strengthened the core, and drove profit turnaround

2014

Achieved record US\$45m net profit

2016

Business turnaround from successful cost saving projects

2015

New cable-laying business in Middle East

Impairment loss to reflect asset market value

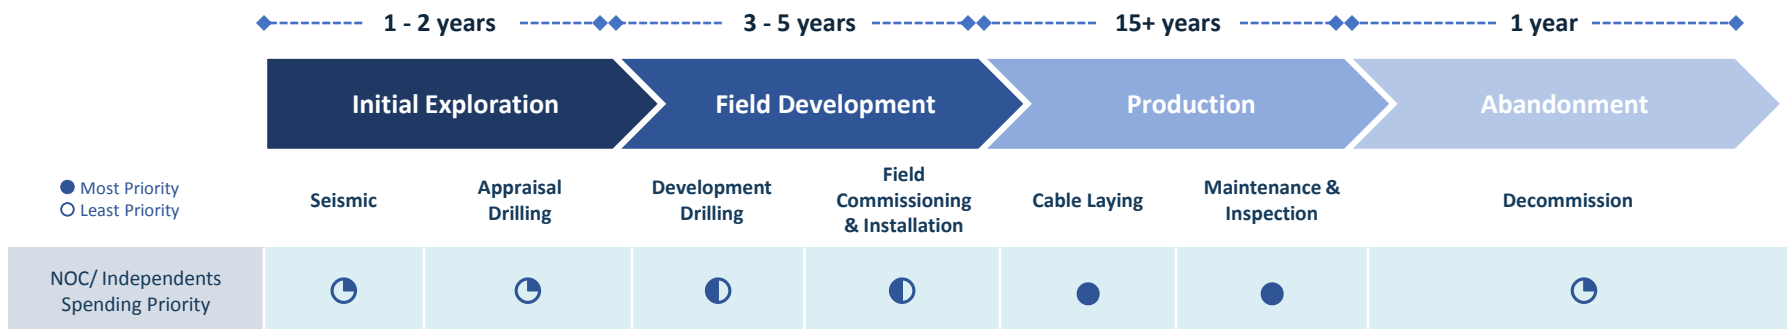

2017

Expanded business to new geographical areas; Malaysia, Singapore and countries in Middle East

GLOBAL SERVICE SPECIALIST

“Predominantly focused on the production phase of the offshore oil and gas value chain.”

DRILLING

Tender Rig is a barge moored alongside platform and contains crew quarters, mud tanks, mud pumps, and power generating systems. A tender rig carries its own drilling equipment and has a crane capable of erecting the derrick onto the neighboring platform.

Activity level for tender rigs globally is highest in South East Asia compared to other regions.

Jack-up Rig is a mobile self-elevating drilling platform equipped with legs that can be lowered down to the ocean floor.

Once a foundation is established, the drilling platform is elevated to a level above the highest expected wave height. When the rig is relocated, the platform is lowered to sea level and towed by a supply vessel to its next location.

SUBSEA

Field Development - Subsea support vessels assist in, among other things, survey and preparations of the seabed, installation of modules, umbilical cables and risers, as well as provision of Remotely Operated Vehicles (ROVs) or divers for tie-in and testing.

Production - Once installed, the equipment is surveyed and maintained, together with both larger repair and development campaigns.

Abandonment - To cease efforts to find or produce from a well or field, and to plug well and salvage material and equipment - subsea vessels are utilized.

Subsea engineering services also include Underwater Cable Laying Services for telecommunications, electric power transmissions, or other purposes.

Mermaid Commander

Supporting demand in South East Asia market

Mermaid Sapphire

Mobilizing to work in Middle East in 2018

Chartered-In Vessel:

Resolution

Working for projects in South East Asia market

VESSEL RUNNING COSTS

Vessel Running Costs Reduction

Owned Vessels

- VRC reductions on active vessels:
 - Marine Crew expenses
 - Dive tech

Chartered-In Vessels

- Two vessels, the 'Resolution' and 'Nusantara', remain on hire vessel in Q4'16
- 'Nusantara' was returned to Owner during Q3'17
- One vessel 'Resolution' remained after Q3'17

SELLING & ADMINISTRATIVE EXPENSES

SG&A Expenses Decreased

- Cost savings program delivered a good results -52% compared to FY2015.
- Saving was mainly driven by staff and employee related expenses, bad debt provision and other expenses.

ORDER BOOK

Total Order Book (excluding AOD)

Order Book by Region

Order Book by Year

AOD 3-Rigs CONTRACT

AOD Rigs Utilisation

Share of Profit of Associates

*Excluding impairment loss and previous year equity dilution

- In FY2017, 99 - 100% average utilisation for 3 rigs.
- Rate reduction effective during contract renewal in 2016 and resulting bareboat charter decrease led to a lower contribution YoY.
- The outstanding balance of Senior Secured Credit Facility as at 31 December 2017 is US\$ 210 million which matures in April 2018 with a balloon payment of US\$ 180 million.
- As all of AOD's fleet of jack-up rigs have maintained excellent operating performance since contract renewals in 2016 and are expected to remain gainfully employed through to 2019, there remains a legitimate basis that a re-financing solution can eventually be concluded that shall preserve the business continuity of AOD.

SUSTAINABILITY REPORT

SUSTAINABILITY REPORT

SGX Listing Rule 711A requires every listed issuer to prepare an annual sustainability report and apply to financial years ending on or after 31 December 2017.

Board Statements:

“The Company recognises the importance of good governance for continued growth and investors’ confidence.”

Reporting Framework:

“Mermaid have used the *Sustainable Accounting Standard Board (SASB)* and *Global Reporting Initiative* materiality standards and sector guides to first identify relevant ESG issues focusing on oil and gas support services companies.”

SUSTAINABILITY REPORT

Environmental Factors:

GHG Emission	Mermaid identifies appropriate environmental performance indicators to access performance against the energy baseline using a methodology in line with <u>ISO 50001</u> .
Emission to Air	Mermaid's Pollution Prevention Protocol sets use boundaries and requirements for company equipment to limit emissions of certain key pollutants. Nitrogen oxides and Sulphur oxides are defined under <u>MARPOL</u> .
Water Consumption	The water consumed in Mermaid's operations is seawater which can be largely returned to the sea.
Chemical Management	Risk and hazard assessment terminology is aligned with the European Union's Registration, Authorized and Restriction of Chemicals (REACH) Regulations as well as relevant Thai regulation .
Waste Generation and Disposal	The bulk of waste is disposed of onshore, where this goes to landfill or in the case of scrap metal, collected for reuse by an onshore contractor.
Ecological Impacts	Mermaid's operations and vessel procedures are aligned with <u>Annex V of MARPOL 73/78</u> on the prevention of pollution from waste management.

SUSTAINABILITY REPORT

Social Factors:

Onsite Health and Safety Management

Mermaid's Safety Health Environment Quality and Security (SHEQS) management system is compliant with the requirements of the Institute of Supply Management, ISO 9001, ISO 14001 and OHSAS 18001.

Employee Diversity and Inclusion

Mermaid is committed to encouraging equality, eliminating unlawful discrimination and encouraging diversity among its workforce – at 69% male and 31% female which represents a reasonable performance within a male-dominated sector.

Governance Factors:

Employment Practices

Mermaid has a number of detailed company policies in place in relation to reasonable working conditions and working hours.

Management Diversity

Management diversity is an issue of key importance to the sector, in terms of ensuring an adequate breadth of experience and views whilst continuing to ensure that selection is based on merit.

Business Ethics

Mermaid has a detailed Global Anti-Bribery and Corruption Policy applicable to all employees.

SUSTAINABILITY REPORT

Environmental Targets:

Target Area	Adoption		
	Phase 1 (2018)	Phase 2 (2020)	Phase 3 (2025)
Reducing NOx and SO₂ emissions from fuel oil	Ensure all engines meet Tier II NOx standards and 2020 IMO targets for sulphur content of fuel (0.5%).	Ensure all engines meet Tier III NOx standards and 2020 IMO targets for sulphur content of fuel consistent with ECA in all regions (0.1%).	Implement exhaust gas cleaning system to limit SO ₂ emissions to below 6g/kWh and explore LNG use to abate NOx and CO ₂ emissions
Sludge generation and disposal	Ensure all sludge is collected and treated rather than incinerated	Implement a sludge management plan for all vessels to ensure sludge generation is reduced by 25% on the 2017 baseline	Explore energy recovery from sludge
Energy demand reduction on vessels	Achieve a 5% reduction in energy consumption by the vessel fleet	Achieve a 10% reduction in energy consumption by the vessel fleet	Achieve a 15% reduction in energy consumption by vessel fleet in line with ETI targets.
Measure and mitigate impacts on the marine environment	Undertake a Strategic Environmental Assessment (SEA) of operational impacts on marine ecology	Ensure 1 FTE employee is assigned to assessing impacts from drilling and other operations on marine ecology	Ensure 2 FTE employees are assigned to measuring and mitigating ecological impacts from Drilling and Subsea Services respectively

SUSTAINABILITY REPORT

Social and Governance Targets:

Target Area	Adoption		
	Phase 1 (2018)	Phase 2 (2020)	Phase 3 (2025)
Employee upskilling	Achieve a 5% manhours companywide training target focusing on skills and QHSE	Achieve a 6% companywide training target focusing on skills and QHSE	Achieve a 7% companywide training target focusing on skills and QHSE
Age balance	Implement an outreach programme to ensure better representation of under 30s in new recruitment	Increase the number of employees under 30 to 20% of total workforce	Increase the number of employees under 30 to 25% of total workforce
Management diversity	Ensure any changes to top management composition work to increase female representation	Increase female top management membership year on year	Ensure 25% of top management is female
Business ethics	Ensure all existing and incoming staff are provided with a training on Mermaid's Global Anti Bribery and Corruption policies	Produce awareness materials for suppliers of Mermaid's Global Anti Bribery and Corruption policies	Develop a screening checklist of Bribery and Corruption concerns for suppliers, including assessment of compliance with the Modern Slavery Act

MARKET REVIEW AND BUSINESS OUTLOOK

MARKET REVIEW

KEY OBSERVATIONS – SUBSEA VESSEL OPS

- Subsea Vessel operations global spend will total USD 50bn. IRM and OSCV activity spend expected to be USD 19.8bn, with 6% CAGR over the next 3 – 5 years;
- Subsea vessel operations for X-Tree installation, production equipment, SURF and pipelines forecasted to grow at 3% CAGR with a pick up from 2018 onwards, representing 39% of forecasted spend;
- S.E.A, US, WA regions will account for 52% of that global IRM expenditure;
- APAC and Africa (7% CAGR) are considered higher IRM and OSV growth markets compared to Europe (5% CAGR) and the M.E. (6% CAGR);

USD 50bn Spend % Apportioning

KEY OBSERVATIONS – CABLE LAY

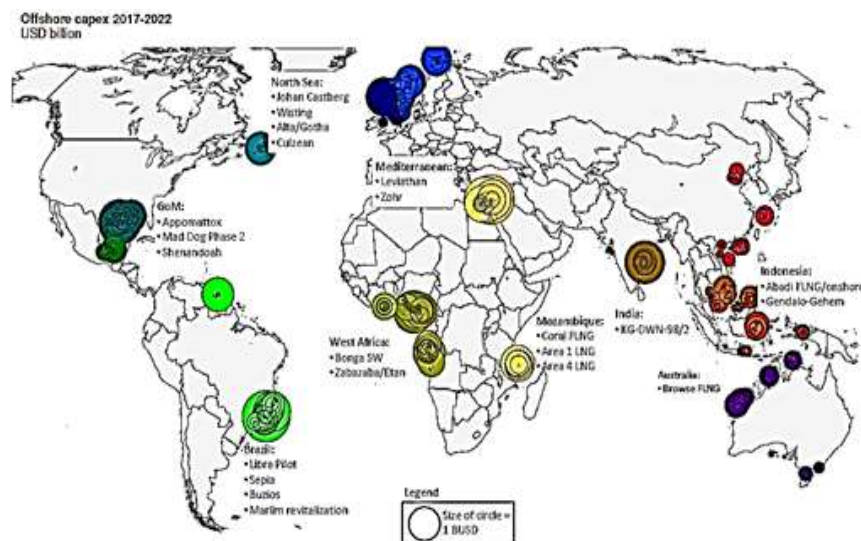

- 2016 Global offshore wind market valued USD 20.3bn, expected to reach USD 57.2bn in 2022 with CAGR of 16.2% between 2017-2022;
- Subsea cable demand will grow at 7% CAGR over period with the offshore wind sector driving the market demand;
- Asia-Pacific & Europe will account for a combined 78% of global cable installation over the next 5 years;
- Growth in offshore wind installation cable laying will contribute 61% of vessel installation demand with vessel day demand growing at 3% CAGR;
- Demand fluctuates for both cable-lay and flex-lay vessels, Flex-lay demand decline to 4% CAGR over the forecast period;
- 8% CAGR for Cable-lay vessels days driven by offshore wind projects;

MARKET REVIEW

KEY OBSERVATIONS – DEEPWATER

- Shallow water resources depletion continues, concentration on new discoveries in deeper waters in S.E.A, Brazil, West and East Africa, the Arctic regions is forecasted over the 5 year period;
- Africa & Americas are key Deepwater activity regions accounting for 78% of spend;
- Asian Deepwater investment will increase from 2018 due to relative stable oil prices remaining above USD 50pb;
- Low drilling and subsea equipment costs, present an upside to offshore project sanctioning over the next 18 months;
- FPSO segment represents 29% of forecasted spend, driven in West Africa operations which were sanctioned pre downturn;

Global Deepwater Spend To Total USD 120bn

Global deepwater capex by component 2012-2021

Source: Douglas-Westwood

BUSINESS OUTLOOK

1

In February 2018, prices averaged \$65/bbl. That's after briefly hitting \$70/bbl in January. Prices were so high because traders were responding to the November 30, 2017, OPEC meeting. The oil cartel's members agreed to keep production cuts through 2018.

2

Rival new-build saturation diving vessels continue to enter the market in 2018, with 2 such vessels entering our regional markets between Q1 & Q3 targeting Middle East, India, and Far East regions.

3

Utilisation of key owned assets, namely our large sat diving vessels is the high priority. Cost cutting and consolidation will continue throughout the year in an effort to maintain a cost base low enough for us to win work in these challenging times.

4

Regional repositioning of key assets is already underway as we look to achieve higher utilization and increase project backlog. The Mermaid Endurer and Mermaid Sapphire have been repositioned in the Middle East.

5

Offshore / subsea vessel companies are still expected to struggle financially in 2018 given the lack of construction and IRM work available, increased subsea tonnage entering the market and the consequential pressure on rates.

BUSINESS OUTLOOK

6

Offshore oil's importance is not going away, nor is subsea services critical position within that delivering spectrum in both mature shallow water areas and Deepwater frontiers. Despite that the short term will remain tough and tricky to navigate. Mermaid will manage due to its cost efficiencies, Business Development activities and our new range of services

7

Mermaid Challenger, Barakuda, 'MTR-1' and 'MTR-2' are cold stacked to reduce cost and marketed for sale. In parallel, we are looking at financially viable ways to reactivate some of the cold-stacked vessels, such as Mermaid Siam, and to commit them to long-term bareboat charters with companies not competing directly with Mermaid.

8

Mermaid continues to preserve cash where possible, and to reduce CAPEX spending to the essentials. However, the company is exploring options to purchase distressed assets where appropriate, in preference to subcontracting in equipment & personnel.

9

Mermaid leveraging on reputation and stability to access additional geographical markets and to cross-sell services across regions. Previous year success in Cable installation awards are being capitalized on with a focus on developing capability organically entering new market segments in Asia Pacific and the Middle East.

MERMAID'S POSITIONING

Wider geographical coverage

- Shallow water – more defensive and less affected by lower oil price. Several conventional projects will be carried-out in Mermaid's home markets in 2018
- Mermaid's expansion geographically into other markets such as North Sea, West Africa, Malaysia India, and the Arabian Gulf

IRM focused, with an addition of Integrated service packages

- Remain focused on IRM scopes, success within the Group of cross-selling other services such as standalone ROV and survey work
- Offer other integrated range of subsea services with a revamped highly specialized workforce leading the company into a new era of Cable, SURF, T&I, subsea Installation engineering

Track record of quality and safety, modern asset base

- Excellence operational and safety record and new stable management team
- Upgrade our subsea fleet with chartering-in plan to serve fluctuating demand
- AOD's three jack-up drilling rigs contract extended to 2019 in the Middle East

Fiscal Discipline

- Retain low gearing and sufficient cash reserve
- Important cash preservation and CAPEX reduction is ongoing, company open to opportunistic 'distressed' asset acquisitions
- Continue streamlining internally to reduce costs

MERMAID

A Company Moving Forward
