1 (d)(ii) Details of any changes in the company's share capital arising from rights issue, bonus issue, share buy-backs, exercise of share options or warrants, conversion of other issues of equity securities, issue of shares for cash or as consideration for acquisition or for any other purpose since the end of the previous period reported on. State also the number of shares that may be issued on conversion of all the outstanding convertibles, as well as the number of shares held as treasury shares, if any, against the total number of issued shares excluding treasury shares of the issuer, as at the end of the current financial period reported on and as at the end of the corresponding period of the immediately preceding financial year.

Issue and listing of placement shares

On 3 October 2013, the Company's Board of Directors announced that the Company has completed the allotment and issue of 58,105,821 Placement Shares. The Placement Shares will, upon issue, rank *pari passu* in all respects with and carry all rights similar to the shares in issue as at 4 October 2013, except that they will not rank for any dividends, rights allotments or other distributions which may be declared or paid, the record date in respect of which falls on or before the day immediately prior to the date on which the Placement Shares are issued. The Placement Shares were listed for quotation on the Main Board of the SGX-ST on 4 October 2013 and the trading commenced on the same date.

Additionally, during the six-month period ended 31 March 2014, the 535,115 ordinary shares (six-month period ended 31 March 2013: nil) were issued as a result of the exercise of vested options arising from the 2008 share option programme granted to key management.

The detail of the change in the authorised and issued and paid up ordinary shares are as follow:

1 (d)(iii) To show the total number of issued shares excluding treasury shares as at the end of current financial period and as at the end of immediately preceding year.

As at 31 March 2014 and 30 September 2013, the issued and paid-up ordinary shares of the Company were 1,413,081,038 shares and 1,354,440,102 shares with a par value of Baht 1 per share, respectively.

As at 31 March 2014 and 30 September 2013, there were no outstanding treasury shares.

1 (d)(iv) A statement showing all sales, transfers, disposal, cancellation and/or use of treasury shares as at the end of the current financial period reported on.

Not applicable, since the Company has not transacted treasury shares during the six-month period that ended on 31 March 2014.

2. Whether the figures have been audited or reviewed and in accordance with which auditing standard or practice.

The figures have been prepared in accordance with the Thai Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" and reviewed by the Company's auditor, KPMG Phoomchai Audit Limited.

3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of a matter).

The Independent Auditor's Report on Review of Interim Financial Information is on pages 1 of the interim consolidated and the Company financial statements for the three-month and six-month periods that ended on 31 March 2014, which are reported together with this announcement and available on the SGX's website and the Company's website.

4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.

The interim financial statements are prepared on a condensed basis in accordance with Thai Accounting Standard ("TAS") No. 34 (revised 2009) *Interim Financial Reporting;* guidelines promulgated by the Federation of Accounting Professions ("FAP").

The interim financial statements are prepared to provide an update on the financial statements for the year that ended on 30 September 2013. They do not include all of the financial information required for full annual financial statements but focus on new activities, events and circumstances to avoid repetition of information previously reported. Accordingly, these interim financial statements should be read in conjunction with the financial statements of the Company and its subsidiaries for the year that ended on 30 September 2013.

The FAP has issued TFRS 8: Operating Segments which is relevant to the Group's operations and effective for annual accounting periods beginning on or after 1 January 2013. The adoption of TFRS 8 with effect from 1 October 2013 has resulted in changes in the Group's accounting policies which are disclosed in note 3 to the interim financial statements.

In addition to the above new TFRS, the FAP has issued a number of new and revised TFRS which are effective for financial statements beginning on or after 1 January 2014 and have not been adopted in the preparation of these interim financial statements. Those new and revised TFRS that are relevant to the Group's operations are disclosed in note 17 to the interim financial statements.

Except for the changes in accounting policy discussed in note 3 to the interim financial statements, the accounting policies and methods of computation applied in these interim financial statements are consistent with those applied in the financial statements for the year ended 30 September 2013.

5. If there are any changes in the accounting policies and methods of computation, including any required by and accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

Details of the new accounting policies adopted by the Group are included in (a) and (b) below. Other new and revised TFRS did not have any impact on the accounting policies, financial position or performance of the Group.

(a) Presentation of information on operating segments

From 1 October 2013, the Group has adopted TFRS 8 Operating Segments. The new policy for presentation of information on operating segments, together with information on the previous policy, is given below. The new policy has been applied retrospectively and segment information included in the 2013 financial statements, which are included in the Group's 2014 interim financial statements for comparative

(Company Registration No. 0107550000017)

purposes, has been re-presented accordingly. The change in policy only impacts presentational aspects and has no impact on the Group's reported assets, liabilities, results or earnings per share.

TFRS 8 introduces the "management approach" to segment reporting. It requires a change in the presentation and disclosure of segment information based on the internal reports regularly reviewed by the Group's Chief Operating Decision Maker in order to assess each segment's performance and to allocate resources to those segments. Previously the Group presented segment information in respect of its business and geographical segments in accordance with TAS 14 Segment Reporting.

The change in basis of presentation and disclosure of segment information has resulted in the Group presenting segment information (note 12 to the interim financial statements) in respect of the following segments: Subsea; Survey; Drilling; and Holding.

(b) Accounting for the effects of changes in foreign exchange rates

On 30 September 2013, the Company's management has determined US Dollar as the functional currency in accordance with TAS 21 (revised 2009) "The Effects of Changes in Foreign Exchange Rates". The adoption of TAS 21 (revise 2009) has impact on the separated and consolidated financial statements, the effects of the change are recognised retrospectively. Retrospective adjustments for the separated and consolidated statement of comprehensive income for the three-month and sixmonth periods that ended on 31 March 2013 were as follows:

The Company had net cash used in financing activities of US Dollar 9.8 million, primarily due to loan repayment of US Dollar 10.4 million and dividend payment during the period of US Dollar 12.2 million, offset against the issue of placement shares of US Dollar 12.8 million.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

Subsea Services*

In line with previous years, the second financial quarter of 2014 is traditionally the Group's weakest quarter for subsea performance. This is attributed to lower demand driven by seasonal factors in the South East Asian and South China Sea region and also the relocation of vessels between contracts.

The Group is continuing to see demand for its subsea vessels and related services as evidenced by contract awards secured as well as ongoing additional requirements from existing and potential customers. Subsea contracts continue to be generally short-term and may be subject to changes in client requirements on short notice. The Group continues to focus on higher vessel yields and longer contract durations in growth areas, such as South East Asia, the Middle East and the North Sea.

The Group is cautiously optimistic that the outlook in the offshore oil and gas industries will remain positive in the next 12 months, given the stable oil price and continued spending by oil and gas companies in exploration and production activities. In January 2014, the Group placed an order for a new subsea dive support and construction vessel with delivery scheduled for 2016.

Based on confirmed subsea order book for the second half of the 2014 financial year and also in line with trends in performance in previous years, the Group is scheduled to resume to comparatively better performance during this incoming period compared to its first half.

Offshore Drilling**

The tender rig market is a niche market with around 30 units globally, including those under construction. The demand-supply dynamics of the tender rig market appears to remain favourable as indicated by industry day rates and utilization, with customer preference for newer rigs. MTR-1 completed its accommodation barge support contract in Indonesia in 2013 and is being marketed for additional work opportunities within the region while MTR-2 is engaged on a 2 year drilling contract in Indonesia until 2015. In January 2014, the Group placed an order for new build tender rigs MTR-3 and MTR-4 with delivery scheduled for 2016 and both rigs are now in their design phase.

The overall demand for jack-up drilling rigs has improved globally and the demand for premium jack-up rigs has remained strong in all relevant regions, particularly in Asia and the Middle East. Oil and gas companies continue to show their preference for newer rigs such as those owned by Asia Offshore Drilling, an associated company. Positive contributions from Asia Offshore Drilling continue as all three jack-up rigs remain fully employed, each on a three drilling contract in the Middle East, since 2013.
