9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The global oil and gas industry continues to experience significant challenges in light of the current oil price environment. Consequently, this has led to reduced oil and gas spending, activity and contract awards across the subsea and offshore drilling services segment as major oil companies have been aggressively pursuing cost reduction or delaying some of their projects. With more offshore rigs and subsea vessels in the market coming off contract and newbuilds yet to be delivered, the supply and demand imbalance will continue to have a negative impact on utilization and pricing in these market segments.

In the subsea business, the Group remains focused on developing this segment and while the Group is not entirely immune to the industry weakness, the Group managed to sustain positive earnings performance in the third quarter of the year 2015. The Group remains dedicated to executing its current subsea contracts profitably and will continue to focus on the South East Asian and Middle East markets which are comparatively more stable. The Group continues to tender aggressively for contracts, and will take advantage of the weak markets for opportunistic business created by the exit of its competitors and the available supply of chartered-in vessels. The Group's subsea business remains well respected in the industry for its inspection, repair and maintenance services; construction and installation support services; hydrographic survey and positioning services; cable laying services; and salvage and decommissioning services.

In the drilling business, the Group continues to actively market the new tender rigs, 'MTR-3' and 'MTR-4', for production drilling contracts. These rigs are currently under construction in China with delivery scheduled for 2016. Compared to other tender rigs, the 'MTR-3' and 'MTR-4' both have advanced drilling capabilities and barge layout facilities providing a safer and more efficient work environment for drilling operations. With stacking and scrapping of older units, we believe that there will be limited, or no, growth in the marketed fleet in this segment between now and 2018. The Group has also marketed the 'MTR-1' and 'MTR-2' for sale given that these older units are more challenged to remain utilized due to the availability of more modern rigs during this downturn. Notwithstanding this, the light weight drilling package and fast rig up time of the 'MTR-2' continues to receive interest from potential customers and is also being evaluated for 2016 work opportunities in both South East Asia and West Africa. In our drilling business joint venture under Asia Offshore Drilling, the Group's three high specification jack-up drilling rigs delivered satisfactory performance, and performed steadily in the third quarter with average utilization of 97 percent.

The Group believes that market conditions will remain challenging throughout 2016 and has taken proactive measures to accelerate cost reduction and efficiency measures in order to reinforce the Group through and beyond the current downturn. The Group has already initiated a reduction in its global permanent workforce by at least 15 percent with total targeted savings of circa USD 6 million to be achieved by end of 2016. This includes release of its operations teams in its offshore drilling division but with plans for reactivation in the event of future contract award, and reduction in subsea operations staffing in the Singapore and Abu Dhabi offices with functions transferred to other offices within the region. On-site shipyard supervision of all three new builds under construction (i.e. one dive support and construction vessel and the 'MTR-3' and 'MTR-4') have also been withdrawn with total targeted project cost savings of another USD 6 million for the remaining project duration in 2016 and responsibility for oversight being transferred to the existing asset management team at corporate office. Recurring activities are also being optimized for cost reduction and efficiency with the aim to improving margins whilst not compromising safety and the quality of our services. Alongside these initiatives, immediate strategies are also to focus on minimizing other overheads, adding to the order book, maintaining a healthy level of utilization for the fleet and to promptly cold stack and/or dispose of non-performing vessels. These cuts have tough consequences for employees across the Group but shows the Group's determination to maintain a long term vision on how it can be best positioned to continue to deliver customer needs, reduce project costs and optimize business performance.

The Group's strong balance sheet will financially help the Group weather the downturn better and, combined with the recent set up of MTN program, the Group is well positioned to capitalize on opportunistic expansion if and when potential distressed assets become available for sale.

The Board is cautiously of the view that the long-term outlook will be positive for the Group and is dependent upon commodity price stability, oil companies realizing the benefits of their capital spending rationalization programs and continued fleet attrition throughout the industry. In this long term, continued production of oil and gas will be required to satisfy world hydrocarbon demand and the Group intends to remain as one of the key players in its segments to benefit from these requirements. Throughout all times, the Group shall continue to remain focused on creating shareholder value.
