Solid 2Q26 earnings in line with our expectation

Highlights

- ASW reported 2Q26 net profit of THB563m (+145% q-q, +184% y-y), broadly in line with our estimate. Strong earnings growth was mainly driven by higher condo transfers, particularly from TITLE's projects in Phuket and JV projects.
- Property transfers rose 68% q-q and 110% y-y to a record high of THB3.4b, mainly driven by transfers from the newly completed The TITLE Serenity Naiyang project in Phuket (THB4b, 76% sold), together with continued transfers from condo projects completed in 1Q26.
- Property gross margin expanded to 44.8% (vs. 42.7% in 1Q26 and 39.4% in 2Q25), outperforming peers, supported by a favorable project mix, particularly higher-margin condo projects in Phuket.
- Share of profit from JVs improved to THB108m (vs. a profit of THB11m in 1Q26 and a loss of THB42m in 2Q25), driven by transfers from two newly completed JV condo projects: Modiz Vault Kaset Sripatum and Kave Genesis Nakhon Pathom.
- SG&A-to-revenue declined to 23.3%, from 26.7% in 1Q26 and 25.9% in 2Q25, driven by operating leverage from stronger revenue growth.
- Interest expenses increased q-q and y-y to THB93m, mainly due to a larger number of completed condo projects.

Outlook

- ASW's 1H26 net profit reached THB792m (+98% y-y), accounting for 52% of our full-year forecast.
- We expect 3Q26 earnings to grow both q-q and y-y, driven by transfers from three newly completed condo projects with a combined backlog of THB4.9b, including two projects in Phuket and one ASW project. A key driver will be the full-quarter contribution from The TITLE Heritage Bang Tao (THB6b, 55% sold), together with continued transfers from Phuket condo projects completed in 2Q26.
- 4Q26 earnings are expected to remain solid, supported by transfers from two newly completed condo projects.
- We maintain our 2026 net profit forecast of THB1.5b (+43% y-y) and BUY rating with a target price of THB9. Our positive view is underpinned by accelerating earnings growth in 3Q–4Q26 and an attractive valuation, with the stock trading at only 5x 2026E PER while offering an 8% 2026E dividend yield.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
